Emergency Affiliate Back-up Internet Streams

For emergency use, affiliates can access a quality stereo Internet stream of our MB1 (Moody-1) satellite programming feed.

By manually adding <http://primary.moodyradiostream.org/MB1Network.aac> in any number of media players, it will directly connect to an AAC+ 64kbps stream. We also have a back-up AAC+ stream and a primary and backup MP3 stream. All mp3 streams are 64Kbps mono and 22050 Hz sample rate.

In summary, the following is a listing of all primary and secondary AAC and MP3 streams available as an emergency back-up fee for our MB1 programming feed:

<http://primary.moodyradiostream.org/MB1Network.aac>

<http://primary.moodyradiostream.org/MB1Network.mp3>

<http://secondary.moodyradiostream.org/MB1Network.aac>

<http://secondary.moodyradiostream.org/MB1Network.mp3>

(Note: Each stream URL is case-sensitive.)

If you are experiencing technical difficulties, we would be happy to assist you. Please call or e-mail David Woodworth, Moody Radio Network Affiliate Support Coordinator at (312) 329-4435 or david.woodworth@moody.edu. If he is not immediately available, you can also call the Moody Radio Network Operations Center (NOC), which is available 24 hours a day, seven days a week.

Network Operations Center Contact Information: Phone: (312) 329-4145

MB1 Listen Line: To hear what is currently airing on MB1, call (312) 329-2031. This line samples the Chicago downlink of audio from MB1 via SES-2, Transponder 7(H) on the XDS-PRO satellite receiver, to serve as an affiliate aid in verifying the status of our MB1 programming feed.
